PATENT FOLIATED ROLLED METAL DYNAMO & MOTOR BRUSHES of ANTIFRICTION METAL.

Owing to the composition of the metal & the construction of the brushes, their conductivity is much higher than those of copper of equal section. They last three to four times longer than copper brushes, & keep the commutator in splendid condition. Invaluable on high-speed machines.

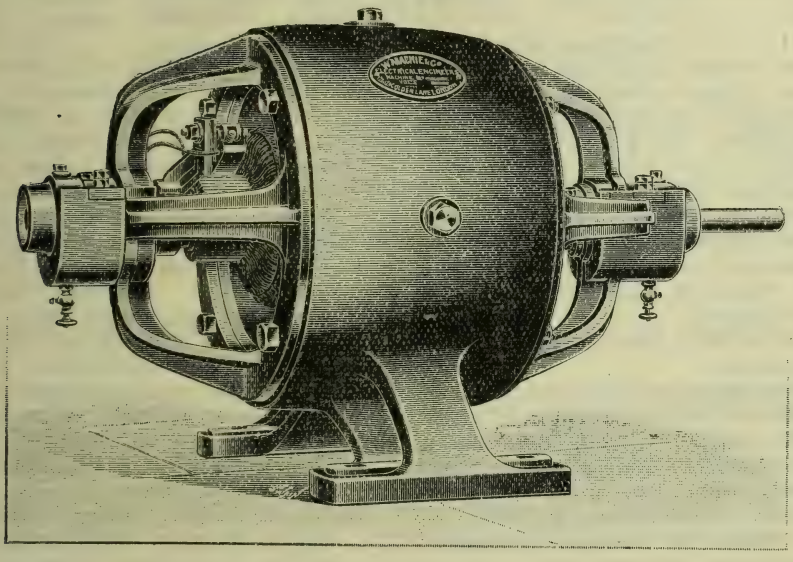
Dynamos & Motors



The Dynamos are so constructed that any one Machine will give 100 and 200 Volts, or 200 and 400 Volts, or 250 and 500 Volts.

The same Motor WORKS ON ANY CONTINUOUS CURRENT CIRCUIT from **200** to **530** Volts, giving the same horse power at the same speed; thus our customers can use their Motors notwithstanding their removal to other districts.

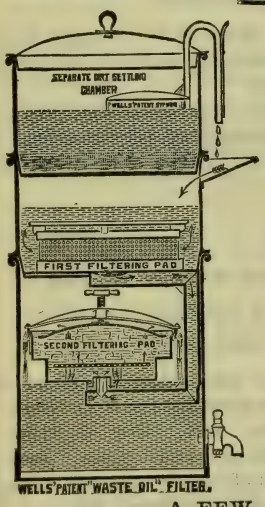
WELLS' PATENT "WASTE OIL" FILTERS.



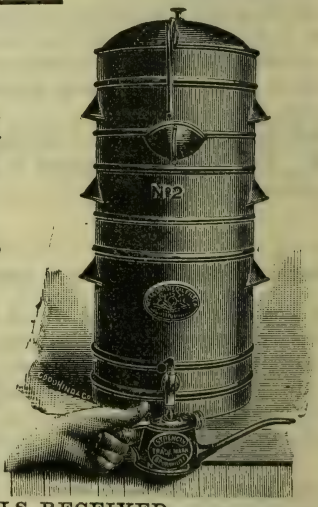
WITH SIGHT-FEED SYPHONS.

Invaluable to Electric Light Installations and All Users of Machinery.

Over 12,000 sold.

Small Money Savers. Dirtied Oil which has hitherto been thrown away can be Filtered and used again and again.

Write for Descriptive Price Lists and Samples of work done by the Filter.



A FEW OUT OF MANY TESTIMONIALS RECEIVED.

"We are very well pleased with your Waste Oil Filter. Our engineer says that he obtains more than half a gallon (nearly three-quarters) of good oil from every gallon of dirty oil put into the Filter, and, as this dirty oil was always thrown away before we had your Filter, you can judge of the saving."

"Your Filter is working wonders. The used oil comes out perfectly cleaned. We do not use a big quantity of oil, but we are quite sure it will save its cost in a very short time. Any firm possessing a Gas Engine would find it very economical."

"We have pleasure in stating we are pleased with the Oil Filters, which are well finished and perform their work satisfactorily. Nearly all the Gas Engines and Dynamo Plants we have put down have your Filters, and use the same oil time after time."
